■ Medical Report Summary

Total Leucocyte Count

****Value:**** 5000 /cumm

****Reference Range:**** 4000 - 10000

****Status:**** ■ Normal

****Explanation:****

Measures the total number of white blood cells, which are part of the immune system and help fight infections.

•

Neutrophils

****Value:**** 50 %

****Reference Range:**** 40 - 80

****Status:**** ■ Normal

****Explanation:****

Measures the percentage of neutrophils, a type of white blood cell that primarily fights bacterial and fungal infections.

•

Lymphocytes

****Value:**** 40 %

****Reference Range:**** 20 - 40

****Status:**** ■ Normal

****Explanation:****

Measures the percentage of lymphocytes, a type of white blood cell crucial for the immune response, especially against viruses.

•

Eosinophils

****Value:**** 1 %

****Reference Range:**** 1 - 6

****Status:**** ■ Normal

****Explanation:****

Measures the percentage of eosinophils, a type of white blood cell involved in allergic reactions and fighting parasitic infections.

•

Monocytes

****Value:**** 9 %

****Reference Range:**** 2 - 10

****Status:**** ■ Normal

****Explanation:****

Measures the percentage of monocytes, a type of white blood cell that helps remove dead cells and fight chronic infections.

•

Basophils

****Value:**** 0.00 %

****Reference Range:**** 0 - 1

****Status:**** ■ Normal

****Explanation:****

Measures the percentage of basophils, a type of white blood cell involved in allergic reactions and inflammatory responses.

•

Absolute Neutrophils

****Value:**** 2500.00 /cumm

****Reference Range:**** 2000 - 7000

****Status:**** ■ Normal

****Explanation:****

Measures the absolute number of neutrophils in the blood, indicating the body's capacity to fight bacterial infections.

•

Absolute Lymphocytes

****Value:**** 2000.00 /cumm

****Reference Range:**** 1000 - 3000

****Status:**** ■ Normal

****Explanation:****

Measures the absolute number of lymphocytes in the blood, indicating the body's capacity for immune response, especially against viruses.

•

Absolute Eosinophils

****Value:**** 50.00 /cumm

****Reference Range:**** 20 - 500

****Status:**** ■ Normal

****Explanation:****

Measures the absolute number of eosinophils in the blood, indicating involvement in allergic reactions or parasitic infections.

•

Absolute Monocytes

****Value:**** 450.00 /cumm

****Reference Range:**** 200 - 1000

****Status:**** ■ Normal

****Explanation:****

Measures the absolute number of monocytes in the blood, indicating the body's capacity to remove debris and fight chronic infections.

•

MCV

****Value:**** 80.00 fl

****Reference Range:**** 81 - 101

****Status:**** ■ Low

****Explanation:****

Measures the average size of red blood cells.

•

MCH

****Value:**** 30.00 pg

****Reference Range:**** 27 - 32

****Status:**** ■ Normal

****Explanation:****

Measures the average amount of hemoglobin in a single red blood cell.

•

MCHC

****Value:**** 37.80 g/dt

****Reference Range:**** 31.5 - 34.5

****Status:**** ■ High

****Explanation:****

Measures the average concentration of hemoglobin within a single red blood cell.

•

Hct

****Value:**** 40 %

****Reference Range:**** 40 - 50

****Status:**** ■ Normal

****Explanation:****

Measures the percentage of red blood cells in the total blood volume.

•

RDW-CV

****Value:**** 12 %

****Reference Range:**** 11.6 - 14.0

****Status:**** ■ Normal

****Explanation:****

Measures the variation in the size of red blood cells.

•

RDW-SD

****Value:**** 40 fl

****Reference Range:**** 39 - 46

****Status:**** ■ Normal

****Explanation:****

Measures the variation in the size of red blood cells, specifically the standard deviation of red cell volume.

•

Platelet Count

****Value:**** 300000 /cumm

****Reference Range:**** 180000 - 410000

****Status:**** ■ Normal

****Explanation:****

Measures the number of platelets, which are small cell fragments essential for blood clotting.

•

MPV

****Value:**** 8 fl

****Reference Range:**** 7.5 - 11.5

****Status:**** ■ Normal

****Explanation:****

Measures the average size of platelets.
